

Summer LEGO STEAM Camp

THE PLACE TO BE ... AGES 4 TO 12

Campers grouped by age and experience

June 8 – June 12

8:30 am - 11:30 am

Mixed Media Art Camp

Unlock your child's imagination through a week of hands-on artmaking! Mixed Media Art Camp invites campers to explore color, texture, and design using a wide variety of materials—from paint and pastels to clay, fabrics, collage, and found objects. Every project encourages creativity, problem-solving, and joyful experimentation.

12 pm to 3 pm

Star Wars Lego Engineering Camp

Join the LEGO Jedi Academy! Young Padawans blast off on a hands-on engineering journey inspired by the worlds, droids, and starships of Star Wars. Each day brings new missions that spark creativity, teamwork, and problem-solving as students design, build, test, and refine their own LEGO creations.

June 15-June 19

8:30 am to 11:30 am

Eco Science Camp

Young scientists dive into hands-on projects that help protect our planet! Campers will make compost, explore the water cycle, design a water filter, build a solar oven for s'mores, study ecosystems, and practice mindful waste habits—all while learning fun, practical ways to "Go Green."

12 pm to 3 pm

Photography + LEGO + Nature Storytelling Camp

Campers learn to see like photographers, build like engineers, and tell stories like creators — all through playful exploration with cameras, LEGO bricks, and the natural world.

June 22-June 26

8:30 am to 11:30 am

Around the World

Campers and their friends will take a trip around the world — without ever leaving home! Each day, we'll "visit" a new country and dive into its language, culture, landmarks, and flavors. Together, we'll build famous structures, explore global traditions, and enjoy making delicious foods inspired by each destination. Mon – Russia, Tues – Mexico, Wed- Thailand, Thurs- Ghana, Fri – France

12 pm to 3 pm

Robotics and Coding

(Campers will be grouped by age and experience)

Young engineers will dive into the exciting world of robotics as they build and program their own moving creations. Throughout the week, campers will explore how gears, motors, and sensors work together to bring models to life. Campers will learn the foundations of coding, practice problem-solving, and gain confidence as they test, improve, and celebrate their creations.

June 29 -July 3

8:30 am to 11:30 am

Mystical Creatures STEAM Camp

Step into an enchanted world where dragons soar, unicorns roam, phoenixes rise, and sea serpents guard hidden treasures. Campers become mythical zoologists, engineers, artists, and storytellers, exploring the science and creativity behind legendary creatures from cultures around the world. Each day blends engineering challenges, creative arts, light science experiments, and collaborative storytelling, all wrapped in a magical theme that sparks curiosity and confidence.

12 pm to 3 pm

Battle Robots Camp

Build. Code. Compete. Level Up.

In this high-energy robotics camp, young engineers dive into the world of gears, motors, sensors, and strategy as they design and build their own battle-ready robots. Each day blends creativity, engineering, and friendly competition, giving campers the chance to experiment, iterate, and celebrate their successes as they level up their robot designs.

CAMP TUITION:

Single Camp Session (8:30 AM – 11:30 AM or 12:00 PM – 3:00 PM)
\$200 per camper for the week or \$45 per day

Two Camp Sessions in the Same Week
\$320 per camper or \$75 per day

After-Camp Drop-In Play 3:15 PM – 5:15 PM
\$15 per day

July 6-July 10

8:30 am to 11:30 am

Nature Engineers

Bats, bees, beavers, birds, and bugs—our incredible nature engineers—have inspired generations of human inventors and scientists to design tools, structures, and technologies that make our lives better. From the way bees build perfect hexagon hives to the way beavers reshape entire ecosystems, these creatures show us how creativity, problem-solving, and engineering are woven into the natural world.

12 pm to 3 pm

LEGO® Stop Motion Adventures

Campers will dive into the magic of stop-motion filmmaking as they learn how to craft a story, design their own LEGO® sets and characters, and bring their creations to life one frame at a time. Using digital photography, students will capture and sequence images to produce their very own animated short film.

Families are invited to join us on the final day for our Red Carpet Movie Premiere, where we'll celebrate each camper's imagination and hard work.

July 13 to July 17

8:30 am to 11:30 am

Bionicles, Hero Factory & More!

Build. Battle. Become a Legend. Step into a world of biomechanical heroes, elemental powers, and epic engineering challenges. In this action-packed camp, students design and build their own Bionicle-inspired characters, Hero Factory mechs, and original robotic creations using LEGO elements, gears, joints, and custom add-ons.

8:30 am to 11:30 am

Dive into discovery at Ocean Science LEGO Camp!

Campers will build ocean-themed LEGO creations while learning about marine life, waves, and coastal ecosystems. The week includes a field trip to the 9th st beach for real-world exploration of the shoreline and sea life—combining hands-on building with ocean adventure!

12 pm to 3 pm

Calming Mixed Media Art & Spa Day Science Lab

Campers will dive into a soothing week of hands-on creativity as they explore the art and science behind their favorite spa and self-care products. Through fun, sensory-rich activities, they'll learn the chemistry involved in making items like bath bombs, lip balm, rose-water mist, and more. They'll even get to sew their own relaxing eye pillow!

July 20 to July 24

8:30 am to 11:30 am

Super Heroes vs. Super Villains

Join the Superheroes as you protect the city, stand for truth and justice, solve mysteries, stop disasters, and maybe even rescue a puppy or two.

Or... unleash your inner Supervillain as you plot to take over the world, design secret lairs, and recruit loyal minions to carry out your brilliantly mischievous plans. Whichever side you choose, get ready to build, create, imagine, and engineer your way through action-packed challenges that put your powers to the test.

12 pm to 3 pm

LEGO Master builders

Where imagination, engineering, and creativity come to life
In LEGO Master builders Camp, young creators step into the role of real engineers, architects, and designers. Each day challenges campers to dream big, build boldly, and refine their designs through hands-on STEAM activities. From towering skyscrapers to moving machines, students learn the art and science behind master-level building while having a blast with friends.

July 27 to July 31

8:30 am to 11:30 am

Ancient Time Travel Adventure: Simple Machines

Travel across ancient civilizations to discover how six simple machines—lever, wheel and axle, pulley, screw, inclined plane, and wedge—powered some of history's greatest engineering feats. Campers will build Greek catapults, explore Roman mills, experiment with pyramid-building techniques, and uncover how the Great Wall was constructed. Along the way, they'll see how ancient innovations shaped the machines we use today.

12pm to 3 pm

Piper – Build Your Own Computer

Build your own Raspberry Pi Mini-Computer! 3rd graders and up will explore engineering, computer science, and electronics by assembling their own Raspberry Pi Mini-Computer. Students will also build and program electronic components to complete challenges within a Minecraft Mod.

12 pm to 3 pm

Beginning Robotics Camp (Ages 4 and up)

(Campers will be grouped by age and experience)

This camp is perfect for young campers who love to build, explore, and bring their imaginations to life. It's a gentle, exciting introduction to robotics that sparks curiosity and sets the foundation for future STEAM learning. Coding programs - Code a Mouse, Coding Robots, Ozobots, Robotics LEGO WeDo 1 and 2!

August 3- August 7

8:30 am to 11:30 am

Pokémon Training Academy

Calling all future Pokémon Trainers—The Pokémon World Championship is coming to the Moscone Center in San Francisco from August 28–30, 2026, and our academy is here to prepare you for the excitement. Campers will learn to identify Pokémon, explore their habitats and powers, design their own Pokémon Island, and create original Pokémon games to play at home. With hands-on building, creative challenges, and a bonus pack of 20 Pokémon cards, every trainee leaves ready for adventure.

12 pm to 3 pm

Photography + LEGO

+ Nature Storytelling Camp

Campers learn to see like photographers, build like engineers, and tell stories like creators — all through playful exploration with cameras, LEGO bricks, and the natural world.

August 10 -August 13

To Be Announced!

**Bring a water bottle, no nuts
snacks and or lunch to camp.
Walking shoes recommended.**
